NORTHERN PROVINCE, VISAKHAPATNAM**

14-10-2013

To

Catherine Lanvers

Loving greetings to you from Arunodaya!

I acknowledge with joy and gratitude the gift of 1000 R O Water Purification Unit installed by 'The Living Springs' at Madugula in St. Ann's Campus. This system is functioning very well and all care is taken for monitoring the security and safety of the system, and regular supply of water to a great number of people of the village. It is a very simple system technically proved right that can be operated. The purity and cleanliness of water is regularly checked by the laboratory, and the beneficiaries are very happy to avail this safe drinking water. It is indeed a blessing for the common people, very much affordable. It is quite profitable to meet any recurring need for maintenance and upkeep of the system. We, the St. Ann's and the people around are of high appreciation to Catherine and others of 'Living Springs' for initiating this project in our place. All of us are glad for you and wish to state that 'The Living Springs' do help for a healthy life, and joy and admiration spring from our hearts.

May God bless you for your good will and generosity.

With loving regards,

Sr. Kusuma
